Subject: EPA Water Sampling in Dimock

Hi Betsaida,

I'm a producer at CNN. My colleague, Sarah Hoyer, suggested I reach out to you. Sarah and I are doing research for a story on hydraulic fracturing and the impact that it's having in Pennsylvania. I would love to talk to someone at EPA to learn more about the new study you're working on and discuss the possibility of going out with your team as they take samples. Please feel free to call or email anytime. My cell is: 404-574-0292.

Thanks for your time!

Jessi Joseph

Producer
